

Color Your Home

WITH IMAGINATION AND DISTINCTION

Vande Hey Raleigh's sweeping selection of colors make your roof as unique as the stars. Our limitless palette of colors inspires the imagination from the soft, gentle shades of Dark Putty to the deep, earthy elegance of Brookville Green. For added exclusivity, our extensive selection of colors can be sequenced or blended to make a lasting impression for years to come.

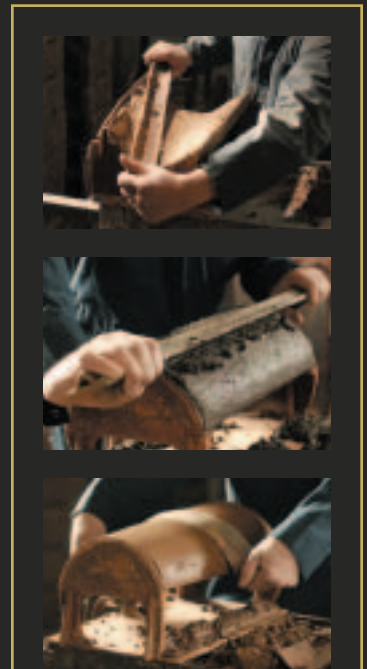

If you dream it, our color specialists can design it. Working with a palette of over 1,000 color formulas, our craftsmen can create roofs awash in the colors of your dreams—from colors reminiscent of a fond memory to colors evocative of a cherished treasure.

Vande Hey Raleigh roof tiles are the height of beauty and innovation. Our exclusive, handcrafted tiles grace historical buildings, stately homes and office developments from the U.S. to Japan. Each of our custom-crafted tiles is inspired by your dreams and created with a blend of old-world tradition and new-world innovation.

We take pride in creating roofs of contemporary elegance for new construction and roofs of ageless beauty for restoration projects. Whether fired by imagination or inspired by antiquity, the distinctive beauty of our roof tile is only enhanced with the passing of time.

Our custom-crafted roof tiles are impeccably hand-tooled to give your roof a precise fit and a distinctive appearance.

Hand-Detailed

TO CREATE THE HOUSE OF YOUR DREAMS

If you dream it, we can do it. We turn dreams into reality with a master artist's respect for time, tradition and detail. Inspired by the finest artists, our design and installation teams work closely with each of our customers to create a distinctive look.

Using time-honored techniques and the spirit of innovation, our master craftsmen create and refine roof tiles with the desired texture, color and shading. Working together with our technical team, they create a high-performance roof system that rises above the rest for lasting beauty and protection.

From design to estimate to installation, we collaborate with architects to develop technically precise drawings and provide contractors with on-site technical assistance.

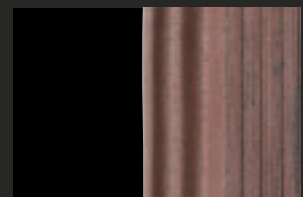

Our comprehensive customer care continues for years beyond the installation of your roof to ensure that your Vande Hey Raleigh roof tile brings years of enduring elegance and peace of mind.

Our roofs are the epitome of distinction and durability. Our smaller roof tile creates a more definitive shadow line, allowing for a more precise fit. This smaller tile and double weather track allows for more expansion and contraction of the individual tiles, which makes it a perfect choice for colder climates.

Vande Hey Raleigh roof tiles, designed for extreme climates, are virtually resistant to the passing of time, the ravages of weather and the hazards of fire. Our roof tile systems withstand wind-driven rain, absorb minimal moisture and defy termites, rodents and rot. Our tile meets or exceeds industry requirements for strength, water absorption, permeability, freeze-thaw, wind uplift, combustibility, dimensions and weight.

Since our roof tiles are designed to perform for years beyond installation, Vande Hey Raleigh roof tiles are covered by a 50-year limited warranty for enduring beauty and peace of mind.

50
Year Limited Warranty

All production tiles must meet stringent quality control standards. Transverse strength testing, a double-troweled waterlock for improved water flow, plus a 50-year non-prorated limited warranty ensure your peace of mind.

MODERN SLATE

Recapture the architectural magnificence of a bygone era with Modern Slate’s classic smooth-surface tile. Its clean, uniform edges and straight, regular butts have made this rugged beauty a classic choice to recreate the historic appeal of natural slate roofs. With a timeless blend of old-world charm and new-world innovation, Vande Hey Raleigh has reinterpreted the weatherworn, storied appeal of this classic tile in a rich palette of colors, sequences and textures to add ageless elegance to any roof.

CUSTOM BRUSHED

The attractive hand-brushed surface of this distinctively antiqued tile imbues each piece with a unique, ageless beauty. Since each tile is lavished, one at a time, with exacting attention to detail, no two tiles are exactly alike in their timeless appeal. Hand-applied antiquing, water lines and weathering create an aged effect. Gently broken surfaces refract the light and create softer, subtler shadow lines.

SHAKE

The wood-like appeal of Shake tile makes it a natural choice to recreate the charm of turn-of-the-century America. Shake tile richly replicates the natural beauty of a real wood shake with its rough-hewn top surface, ragged edges and rugged butts, but with the peace of mind of a Class-A fire rating. Each custom-crafted tile is raked in even strokes or brushed in an uneven pattern to impart the natural depth, distinction and shadows of real wood. Shake tile is often laid in a staggered pattern, a technique perfected by Vande Hey Raleigh. Staggered patterns are available for other flat tile styles, such as Slate, Brushed and Cotswold Stone.

COTSWOLD STONE

This classic tile recalls the pastoral charm of the roofs that once graced the stately manors and churches of England of long ago. Each of these distinctive tiles has been lavished with our master craftsmen's attention to detail to impart the dimpled, split shale quality that defines the ageless architectural style of the English Cotswolds. By blending the finest of old-world tradition and new-world innovation, Vande Hey Raleigh's Cotswold Stone tile has become a stylish choice to lend historic beauty and enduring distinction to homes of any age.

HIGH BARREL SPANISH

The characteristic one-piece, rolling barrel design of this magnificent tile recalls the rugged grandeur and sun-baked skies of the Old Southwest. Although the traditional adobe clay is the color most often used to recapture the elegance and dramatic shadow lines of this era, each High Barrel tile can be treated with a variety of custom-crafted colors and hand-tooled textures. With a blend of tradition and innovation, Vande Hey Raleigh craftsmen lovingly imbue each tile with a modern antiquity as memorable as the desert sun.

RIVIERA

Riviera's striking beveled surface recalls the sun-baked simplicity of Mediterranean tile. The exposed ribs of this semi-flat tile create strong diagonal shadow lines, a more symmetrical look and a more exclusive-looking roofline. Using time-honored techniques, Vande Hey Raleigh artisans precisely apply handcrafted detailing and customized colors to create dramatic shadow lines with a unique architectural modernity evocative of the Mediterranean sun.

ENGLISH SHINGLES

English Shingles add simple elegance to any style of roof, either as an accessory piece or to give historic authenticity to an entire roof. These small tiles can be custom-sized to complement reroofs and additions, add aesthetic appeal to small areas over bowed windows, or can be used as siding on dormers. Their smaller size also makes them a stunning choice to recreate the roofs that once distinguished homes in 1920s America. Like all Vande Hey Raleigh roof tiles, each of these hand-tooled treasures can be created in a choice of smooth or custom-crafted surface textures.

TURRET SHINGLES

The classic lines of **Spanish Pans and Covers** (right photo) lend a look of Mediterranean antiquity to any style of home. Their gently tapered, smoothly curved cover and coordinating pan create a stunning roofline with a dramatic interplay of shadows reminiscent of another age and time. Non-tapered pans and covers can be used for conventional sloped roofs.

Tapered Turret Shingles (left photo) are custom-designed with the same exacting attention to detail to craft the perfect top-to-bottom fit on curved or turret roofs.
