

January 14, 2010

To the Loyal Customers of Vande Hey Raleigh:

I would like to take this opportunity to thank you for supporting our custom metal program in 2009. As we move forward into a New Year, I am very optimistic of what the year will bring. We have done a number of projects in 2009 consisting of 1000's of feet of wall copings, many custom cupola's and weathervanes as well as chimney shrouds, custom finials and copper standing seam roofs.

Most recently, we just completed a sizable project at St Mary's Hospital in Green Bay, WI. The job consisted of approximately 700' of 12" box gutter with .032 aluminum liners and open face downspouts. The gutters and downspouts were fabricated from .063 aluminum sheet with a custom color Kynar 500 finish. We also supplied approximately 35 squares of 24 ga standing seam panels and all related flashings fabricated with the same custom color Kynar 500 finish. The scope of this project and the many other projects we have fabricated in the past year is proof that no job is too big or to small.

Feel free to contact me with your next custom metal project. Once again thank you for your continued support and we look forward to working with you in the years to come.

Sincerely,

Mark Vande Hey
